

FROGGIES TOKEN: Launched November 2021, is a project driven BY the community and FOR the community. With the right prioritization and investments, we are building and delivering unique and safe utility to the crypto meme coin space.

The founders of FROGGIES token are experienced investors and community builders who, after seeing many new programs fall victim to rug-pulls and scams, decided to create their own fair, safe and transparent project:

\$FRGST Token.

With over 35 years of combined team-experience in crypto, we have continued programming and delivering on our promises since our token's inception.

Our visual atmosphere is rooted in space, the ultimate destination for a better future. Our goal, to be the first frogs on the moon...

Investor security measures: BSC

- **Locked Liquidity Pool**
 - 100% Fair Launch
- **Team KYC- CertiK**
- **Partial team Doxxed**
- **Tax cannot be set higher than 15%**
- **CertiK Contract audited**
- **5 Verified Telegram**

Froggies Token BSC:

Tokenomics:

Max supply: 100T 40% Burned at launch

Current Max Supply 58T

Tax Structures:

3% buy tax

3% sell tax

Froggies Token ETH

Tokenomics: ETH

Max Supply: 50,000,000,000,000

Tax Structures:

0% buy tax

0% sell tax

Partnership with CertiK

In everything our developers create, we have our community in mind first. Safe investing is our number one priority, and for this reason we continually partner with CertiK for audits on every contract we

provide. A top tier meme coin, with top tier security, your hard-earned investments will always be safe in your wallet, where they belong.

Migration to Binance Smart Chain Contract

We migrated to the Binance Smart Chain (BSC) to ensure a more stable liquidity pool and provide holders and investors with lower gas fees. Broadening our utility functions on BSC has enabled our program to continually expand safety, without making our investors pay the bill with 500x lower gas fees for every network transaction.

Launching an upgraded website

The website right now is an updated visual interface to our FROGGIEVERSE. A community inspired rebrand was delivered parallel to our contract migration, adding a fantastic layer of graphic creativity which matches our future vision.

Staking platform RICH RIBBIT release

After months of programming we are extremely proud to have launched RICH RIBBIT.IO With over 23% of the \$FRGST supply already in the staking pool, we hold more locked liquidity and secure tokens while incentivizing our holders with long term rewards and high APR's. The staking contract has been renounced and hard coded with no team withdraw function. Team cannot withdraw tokens.

STELLAR INNOVATION

FROGGIES FUTURE

We are building on top of our new and audited BSC contract with a multi layered entertainment platform where community members can play, compete and earn \$FRGST through a multitude of online gameplay. Besides safety, our main focus is Utility, where our token will both EARN and BURN: A deflationary interstellar renaissance.

NFT with galactic use-case

We have released multiple NFT series which do not only have their value as visual art, but will act as a further layer of utility, opening up possibilities for their holders within our ecosystem.

2024 Is Froggies year.

We have already released two telegram bots for use across all groups.
1. Cracker Jack: Is a Slot Machine Bot Integration that brings buys and entertainment to your telegram group. Already in use is over 160 groups

Realsed our Dreamodyssey.io our NFT minting platform

Also, in 2024 Froggies plans to:

Launch FRGST on ETH

bBridge from BSC to ETH
Launch Froggiesfortune.com casino
and more....
